

Weed Eater (Edmond)

Location **Oklahoma**
<https://www.genclassifieds.com/x-440689-z>

I have 2 weed eaters that need service.

The fuel line is broken on both weed eaters so to my knowledge, this is what needs replaced.

I am looking for someone to install the fuel line on both weed eaters.

Please have experience working on lawn equipment or the know how to help me with this.

I took the weed eaters to a local lawn service equipment company, and they could not provide me a good estimate. He said in most cases, it is around \$90 to repair a weed eater. You can purchase one for about \$150-\$200 so I decided not to have them repair it.

Please name your fee for repairing each weed eater along with why you are capable of fixing my weed eaters. Thank!
