That's right. The pool, the lake. . .are you ready?

Or are you carrying more fat than you'd like?

You have two weight loss options out there, smart and stupid.

Stupid is forking over your hard-earned money for:

- hocus pocus supplements , pills, or shakes
- magazine, online or TV scams. . .especially the "money back guarantee" ones

Stupid is destroying your health and rebound weight gain with:

- fad or crash diets
- any unsustainable practices
- starting out with an aggressive exercise program

Smart is:

- an old-school food-pyramid based balanced diet with gradual weight loss in mind
- drink water
- always health first, with fat loss second
- a low-intensity aerobic exercise program starting from zero and gradually increasing; think LSD (Long,

Slow Distance)

Swimsuit Season Around the Corner OMG (Laramie) is a Laramie-based, educated and experienced wellness pro. I have the mileage on me to understand obstacles of daily living, and the knowledge to help you work
