Shifts perfectly and runs flawless now. Its been my daily driver and runs like it should. mechanic owned

Don't be bam- Gabe's car is apparantly not his own. He got it wrong gen. Also so only 1000 miles on it. might be a fix. New 2014 gen.

This has been a great pick up for me, but all good things must be past on. the motor in it makes this 2k pound car a joy. And every vw shop ive taken this car to has gone out of their way to tell me how strong the motor is running. This car is an enjoyable ride. You will get people always commenting on the car.
