## Where Are You, Timothy Leadbelly (walnut creek)

Location **California** https://www.genclassifieds.com/x-442370-z

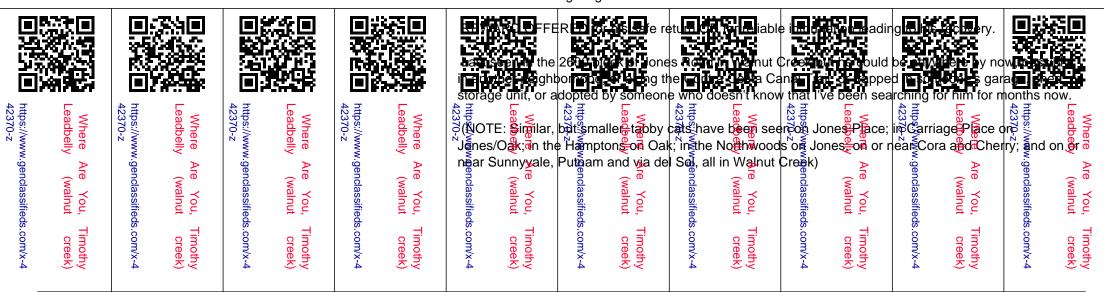

My beloved gray-and-white "tuxedo tabby" cat has been missing for several months now, but I am not giving up!

Timothy Leadbelly is a very large, neutered, 8-year-old cat. From the sides or above, he looks gray with dark striping. But when viewed from the front, his white chin and white chest (or "bib") are visible. He also has white paws and a white stomach.

Distinctive features are:

- -- pink nose
- -- green eyes
- -- large appetite (but prefers dry food to wet; doesn't care much about milk)
- -- shyness; tends to be skittish around strangers -- but might respond to the sound of a rustling bag of drycat food or to the call "Fresssssssh kitty crunchies, fresssssssh crunchies!"

If seen, do NOT chase him. Instead, phone me with info on his whereabouts. Better yet, text me a PHOTO of a cat sighting.
