Technology Entrepreneur Forum (Waltham)

Location   **Massachusetts**
https://www.genclassifieds.com/x-442961-z

 The EntreTech Forum's vision is to be the leading venue for the discussion of the issues relating to the successful commercialization of university intellectual property.

 Our mission is to bring together university researchers, aspiring and seasoned technological entrepreneurs, investors, and service providers who are participants in our regions innovation infrastructure with the intent it network and educate through a series of high quality and topical panel discussions and presentations.

 Next Meeting: May 19

 Predictive Analytics Cross-Industry, from Healthcare (physical and mental) to Government, Law Enforcement and Marketing

 Business intelligence and data analytics have increasingly become vertically focused (e.g. domain). Is there still a need for cross-industry analytics? What do vertically focused solutions provide that cross-industry cannot? What can horizontally focused solutions provide over vertical solutions, if anything?

 What impact does data-driven thinking have on BI and analytics? Does this impact vary for domain-specific solutions? How about for cross-industry solutions?

 This panel will discuss the current state of BI and data analysis, including how they have evolved and what solutions they provide. In addition, the role of data will be discussed in this context.
