I am looking for one or two semi-attractive girls that have a natural love, ear and voice for harmony. Solo parts as well. I am hoping that you have the ability to memorize well and that it comes natural. This is all original Jazzy/Rock/Pop material. At most times you will be backing my verses and joining in on the choruses or doing oohs and aahs or counter melodies. I like input so it should be fun!

If you are one of those girls that sing the harmonies to your favorite songs, then you will probably be a natural. We get together weekly with the band, but I would like to somewhat pre-prepare next to an acoustic piano before calling in the guys in the band, as I don't want to waste our rehearsal time.

I am not looking for someone who is busking on Frenchman or Bourbon or Royal Street, because you will not have the time for this to be productive. Unique voices are encouraged as long as you are on-key!

Send me some contact info, link, pic, and a little about why you would enjoy this. Also, it would be better if it were two friends, as we are a friendly bunch of gentlemen. We rehearse in Uptown near Tulane university

This is currently a position of artistic fun and not a paying position. Hopefully this will.
