I have a 1997 Pontiac Sunfire. just put a brand new \$150 alternator in it, and two new front tires. I had planned to use this car as my daily driver but I need the cash asap, so its got to go. It has 186,xxx miles. It runs pretty good, doesn't need anything to drive down the road. Its no beauty of course but it gets the job done. The only downside to it is the driver door hinge is weak so you have to slightly lift it to close it. The battery needs jumped otherwise it should be fine. I'm asking \$1000 or best offer. My phone number is

call or text..
