2002 wrx completely stock nothing modified to the car mechanically.?
Only things that have been done to the car is I plasti-dipped the wheels black, they are gold underneath.
It has been well taken care of and kept up with maintenance.
Out of the blue the engine has started making an odd noise, but still drives and runs.
Since I'm not a mechanic I'm not sure what's wrong so I've kept it parked to prevent damage.
Its a 2.0
