I have a beautiful young bengal cat. Male. Neutered front claws removed. We just got him about 6 months ago and we are getting ready to move and can't take him with us. The lady we got him from was unsure of his age as well. She rehomed him bc of a new job.He is a bit shy at first but warms up. We paid a rehoming fee of 250 and would like to get that back out him. He will come with his leftover food liter box liter and anything else of his i can get together. Located just north of bowling green mo. Travel to ofallon every other week so could meet.
