Okay. I have a gaming PC, custom built (specs are as listed in the pic) and i want to trade for a PS4+400 cash (\$300 value on PS4, and \$400 to bring it up to \$700 total, which is WAY less than i payed for this near 4k gaming rig)

This is the BEST deal on a PC you will EVER see!! Get your Alienware killer for thousands less!!!

All info on the system is in the picture of my Nvidia experience. Anything else you can gladly ask me PC comes with Razer Deathstalker.
