

mercury sable 2004 need ac bypass

Location **Ohio**
<https://www.genclassifieds.com/x-444778-z>

hello, looking to get lucky and find a good mechanic who can work on my mercury sable and fix my ac compressor. It's making noise and I know it means my belt can go any minute. Replacing the whole ac comp and tubes and everything is too expensive. It would be more then the car itself. please contact me if you're a mechanic who is confident with this task.

Also if you are familiar with this car or this specific issue and know a different way to go about repairing it I am open to that as well.

Email or text

Thank you in advance,
