

# Looking for Sound Guy for a Student Short Film (Nashville, TN)

Location **Tennessee**  
<https://www.genclassifieds.com/x-445630-z>

We are a group of student film makers in the process of making a short film, that I can detail a little more about in a personal email to anyone interested in helping us out, that is very important to us to get finished.

As of now, we are unfortunately no longer able to obtain any means of getting good audio, and that is one of THE most important factors to get right in production.

So we are now seeking an audio guy, who has his or her own gear, that would be willing to help us out. There is no pay, but you'd be doing us a **HUGE** favor in which you'd be helping us work our way to achieving our dreams.

Everyone here is working for the experience and to have something nice to put on their reels, which is also another point why anyone might want to help out. Perhaps another point might be if you or someone helps shoot our project, we can help you right back and shoot a project of your own if need be. I'm sure you might find that a bit risky, us being students, as the word student could often be associated with "rookie" but I can assure you that what we do is of good quality, and please read the next sentence with that in mind. To anyone interested, I can also privately share a scene from the story, that has already been shot, to assure you the quality in which the film will be made in.

Any help would be so very much appreciated, as we really can't do this thing without audio. If you'd like to help us out, please email me, Thomas Wolf (DP, Editor, and Producer) directly at my email,

Thank you for taking the time to read our plea, have a great day.
