I am looking for someone part time to help me sale my services. I build custom business web applications based off a business's requirements and needs. I need someone who can generate leads and bring in clients. I will pay 25% of all earnings off the clients you bring in, this includes residual income from any future needs of the client.

I deal with Web Apps, Websites, SEO, Cross Platform Functionality, Mobile Solutions, and also Web Site Update/Upgrade, Repair, and Marketing Tactics.

One sale can net $2000 if the right client is.
