 20 Blinds Minimum  
 Installation Within 5 Days

## Description:

Faux wood blinds are an alternative to real wood blinds.

Made of a composite of man-made materials and natural wood particles, faux wood is also a less expensive choice than natural wood.

These blinds have become more popular as the products have matured, becoming cheaper and more versatile at the same time offering more of a natural wood look.

Current faux wood blinds are more warm resistant than ever before, have UV ratings as high as 500 and come in many colors that can be had to match your natural wood.
