

FREE Yellow kittens. Last two (west fork)

Location **Arkansas**
<https://www.genclassifieds.com/x-446345-z>

This ad has been relisted as the lady with first 2 picks of the litter had a health emergency and couldnt keep them. Only those two are left. They are the mostly white male in front and the champagne female next to him with her back to the camera. Do not want to seperate them now that they have left once together. Would like them to go together if possible.

They were 8 weeks old friday May 15th, eating crunchy and canned food with milk replacer, litter box trained and have been treated for roundworms. Too young for anything else. Never been outside except on the porch. Friendly as the dickens. Please come get them before my wife keeps them both.

Call for directions. Easy drive near north west fork, about 4 miles from 71, all pavement. About 15 minutes from south fayetteville. No text please, phone is a land.
