If you have a home-improvement project that you think you would like to attempt but not sure you can handle it yourself. Contact me and we can do your project together; I have most tools to do most jobs if you don't. I am 47 years old and have been a carpenter for over 25 years. Help-You-Build has always been a dream of mine and now it's actually happening. E-mail me and we will sit down and talk about your project. Thank-you for your time and.
