I have a small company that focuses on small business consulting.

I am quickly taking on more projects - and I'm only one person - so I'm looking for some people to help.

Some of the tasks that I am assigned by my clients include:

- web design (wordpress or HTML/css)
- social media (posting, making the page look good, etc.)
- social media advertising (pay-per-click campaigns primarily Facebook)
- uploading products to Amazon account and making Amazon account
- marketing strategies

My plan is to just give my helpers a percent of what I'm paid, and we're paid in advance so it's a win-win-win.

I'm flexible with everything - if you just want to help out with one project, that's okay.

My email is in the "reply" button.
