Remote Virus Removal and Optimization -- only a \$60 flat rate! Call Jason with Bad Gorillas Computer Repair today! Requirements to be eligible for a remote repair: A desktop or laptop PC in need of repair. A High-Speed Wired or Wi-Fi internet connectionÂ Â Cell-Phone hot-spots Will NOT Work, period.Â Â If you can't get on the internet, it's often because some malware has set up a proxy server. I can help you fix this over the phone. You must be able to boot your computer without any 'hang-ups', log in to windows, and connect to the internet. If your computer can do these things then we can fix it, no matter how slow it is or however many pop-ups there are! Be able to leave your computer running and online for a full 24 hours, without interruption.

How does our process work? We must speak over telephone for the initial setup. We will walk you through the steps necessary to help us setup a safe and secure 128-bit SSL connection directly from our workstation to your machine. We will initially setup 'unattended access'. Our repair will take anywhere from 2 to 24 hours, and reboots will be required. It's easy to Pay via PayPal's secure paperless billing.Â We will send you a PayPal invoice to your email inbox which you can pay safely and securely with any credit or debit card. Please Note: It is important to us that our Remote Repair process be as transparent and straightforward as possible. You will be able to see what we are doing to your computer throughout the entire repair process. Every window we open, every move of the mouse cursor will be visible on your screen. Bad Gorillas are Professional and Honest Gorillas! What changes are we going to make to your machine? We are going to remove any malware and viruses, bloatware which comes pre-installed on many computers,Â and any other 'crapware' we may find. We then install and update missing or outdated drivers, making all of your computers hardware devices function correctly again. Next we install

a pair of free security softwares that when run in tandem will protect your machine most kinds of malware and attacks. Next to that we will install a set of total PC software and tools that will help your computer play a better game, and make it look like that you are on the internet. We will also make your computer look like it is running on a faster driver. We will also make it so that after we log out for the last time nobody will be able to access your machine in the future-

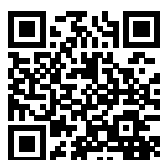

not even us! Are you a Windows 8 user? Do you want a classic Windows 7 style start menu? We can do that for ya!

What won't we do? We will not approve a repair on a machine that doesn't meet the basic requirements. We will never look at or manipulate any of your personal files. We will never keep any backdoors open on your machine. We will never try to upsell you a service you don't need. We will be transparent and open on every job- watch us repair your machine.

Â ----- 10 Safety Tips for using Craigslist Services Does the service provider give you a contact name and public email address? Do they provide a local number where you can call for a consultation, or do they insist on 'txt only plz'? Call them! Do they answer in a clear, professional manner, or do they throw you a 'Whaddup'? Do they have a website? Google the name of the business. Do they have an online presence other than craigslist? Do they publicly advertise an address, or do they only want to service your computer in your home? Have they provided a clear pricing structure? Do they have clearly defined hours of operation? Are their ads poorly made and lack attention to detail? Spelling and grammar? Do their ads have any custom graphics? Choose your Craigslist Service Providers Carefully! Find out for yourself if you are dealing with a real business or a part-time! -----
