we have here a great used for one year radiator for s10's from 1998-2003 with the 4.3 v6. it is set up for engine oil cooler and auto trans cooler; if you have a manual or no engine oil cooler, it still works, you just don't use the fittings. came from my personal truck, that i parted out. it had two electric fans on it, but i took them off, for my newest project. great price, hate to scrap it.\$15.00 FIRM
