This is a PREWAR 26" men's bike without head badge, so I can't tell you exactly what brand it is but it looks like an early SCHWINN or MONARCH. it has straight out drop outs in the back with built in chain tensioners, skip tooth chain and sprockets, rear rack and front fork trusses. white wall tires and tubes have been replaced. THIS IS A RIDER NOT A SHOW BIKE that is at least 75 years.
