For sale is a virtually new HUGE multifunction printer / fax / copier / scanner. It's a wide format printer meaning it will print up to 13 x 17" posters / paper. It has two paper tray so you can have regular paper in one and photo paper in the other. It does borderless printing as well meaning you can print right to the edge of the photo paper.

There's nothing wrong with this printer and it's only a couple months old. It comes with everything including the original box. My price is firm, you can find it online for \$300 (\$225 on Amazon on sale if you act fast) and I'm only asking \$100 so it's already a really great deal. Included will be all the original stuff and a set of empty ink cartridges that you can get refilled with 3rd party ink.

Please feel free to ask any!
