Hi, I'm needing a transmission taken out of a 1999 Ford WindStar Van. Also need someone to put in another transmission to the van. We're on a limited income so I'm needing someone to do this for as little as possible. I can pay around \$400 for the labor and I will buy the replacement transmission. You need your own tools since I doubt I'll have what's needed. This needs to be done safely & correctly since there is a small child who rides in the van. I appreciate you for taking any interest in helping with this! God
