Privacy! Privacy! A second floor balcony that overlooks your "own backyard." Location is the blessing of all real estate and this unit is no exception. Your designated parking space and in-ground pool are just outside your door. Very rare for a high-density complex. The unit has all upgrades including being freshly painted, new commode in bathroom that has a vanity and NEW CARPET! This unit has NEW WINDOWS installed in the living room. Step outside your dining area and onto your balcony for a barbecue. Your kitchen is a space saver, but with ample cabinets. A sit down counter that can seat four people is a built-in feature. This unit comes complete with its own basement. Finish it off or just use for storage and of course, your washer and dryer hook-ups. This condominium shows like a SAMPLE. WILL NOT LAST!!!

Great school system. Community swimming directly across the street. Many features plus a 350 square feet basement and storage area.
