I have been cleaning and repairing computers for over 10 years. I have delt with just about any problem you can think of. I know how frustrating a slow computer can be. Especially when your in a hurry to look up an address or copy a file. Slow computers drive me crazy but what bothers me even more is when I see people get over charged for simple issues that only take a few clicks. Thats why I won't charge anything until I have looked at the problem and know exactly what needs to be done and you will never be charge more than \$75 no matter what the issue or how long it takes to fix it. If you have a slow computer or think you may have a virus then give me a!
