Greetings. I am currently in the process of publishing a children's book which features African-American children. I am looking for an illustrator who can do an awesome job drawing African-American children.

Right now, I am in the midst of a campaign that promotes the book. I am seeking out an individual who can create 5 sampled and illustrated pages that will show my audience what the book will not only be about, but also what the book will look like. Before we proceed, I will need to view samples of your work, which will greatly shape my decision in choosing a suitable illustrator for my upcoming children's book. From there, we will then discuss the concept of my book to make your job

**NOTE: I own the exclusive rights to this book, and you will be compensated based on the work you've done for 5 pages ONLY. If I choose to retain your services throughout the duration of this project (which is estimated at 32 pages), then I will adjust your pay.
