I'm looking to expand my web design business by adding 2 salespeople to bring in more clients. Most of my websites are done in WordPress and I do have samples online. This is a home based business so I don't need someone to report to an office on a daily basis. If you deal with businesses on a regular basis this might be for you. If you are in sales/marketing then this is definitely for you! If you know something about web design, then that's even better but it is NOT a requirement.

If you can bring in 3-4 completed deals (I have contracts) per month, then that would be great. Work as much as you want. Bring in the completed deals and I do the rest of the work.

This is a contract position so you and I will need to sign a contract that spells out our agreement in order to avoid any confusion.

I will provide 30% commission on all finished websites from your completed deals that you have provided to me. A simple \$700.00 website deal would payout \$210.00. I have a portfolio of my work and I will provide you with brochures and any other support materials that you need.

I do NOT provide leads but feel free to use: County list of new business licenses Elance Craigslist ads Your business network Networking Events Telemarketing You must be: Sharp Intelligent (if this ad is confusing do not apply) Well-spoken Honest Due to the amount of span that I receive only telephone calls will be accepted. No emails will be opened from interested parties! Only For Serious People, who wants to make some extra cash. You can check me out at marshallwebdesign.com. I can be reached
