I am a pro photographer in Denver hoping to add at least one videographer to complete the coverage of the wedding. The compensation is the RIGHT to use the video for your own advertising purposes. This is a great opportunity to enhance your portfolio and lure new business your way. I don't shoot weddings any longer but this is how I got started in Denver and it works very well. If you also offer photography that would be a plus. Same deal for photography except the pics will be uploaded to a laptop on site after the shoot Only serious Videographers/photographers will be considered. Must have an existing web site and have shot some weddings. Will consider all applicants. Thanks. Call
