

ESPARIOS Study A Medical Research Study on Endometriosis

Location **Pennsylvania**
<https://www.genclassifieds.com/x-461935-z>

The ESPARIOS Study is evaluating the safety and effectiveness of an investigational medication for moderate to severe endometriosis pelvic pain.

If you're a woman 18 years of age or older and have been surgically diagnosed with endometriosis within the last ten years, you're invited to see if you may qualify for the ESPARIOS 1 study. The purpose of the research study is to evaluate the safety and effectiveness of an investigational medication for the management of moderate to severe endometriosis-associated pain and other endometriosis-related symptoms. This study is evaluating different doses of a vaginal ring versus placebo and injectable medication. Each individual will be evaluated to determine her study participation eligibility. If you qualify, you'll receive the investigational study medication, study-related medical exams, and laboratory services at no charge. You may also be reimbursed for travel and other expenses.

For more information and to see if you qualify please complete this online survey:
