Hello!

I need some help coming up with a small design to take to my tattoo artist and was hoping I could find someone to work with me on that. Maybe an art major who has some spare time over the summer.. :)

I have the basic components I want the design to include, I just need someone who is creative and can help me make it more "artsy" and badass. I'm going for a sort of surrealist/modern style. Not going for super colorful. I don't really know art terminology but I can give you examples I like.

Of course I will pay you -- I was thinking something like \$15/hr but we can discuss pricing. It should be a pretty quick and easy job. Let me know if you think you are the one to help, maybe send me an example or 2 of your work!
