

# WANTED iOS Developer for Startup

Location **Massachusetts**  
<https://www.genclassifieds.com/x-464071-z>

Enjoy creating Apps? Look no further. I'm in search of someone that's either in school or has free time after work, to contribute on a few cool and exciting apps.

If you're creative, have "some" experience creating apps, and want to be part of the next "best thing", let's work together and make it happen. Most commonly referenced in business literature: a B idea mixed with an A team, is much better than an A idea with a B team. An iOS developer is all that's left to have our A-team.

Our team already has a few ideas in place, and one app has already been developed on the Android side. Just need your help to make the magic happen on iOS.

The compensation is primarily equity based, with hopes for funding to occur in the future. Equity is negotiable. Please send a resume or a quick bio of your experience.

Located around the Lowell, MA area, would encourage anyone local to email me so we can discuss.
