

Vintage Audio

Location **Minnesota**
<https://www.genclassifieds.com/x-465096-z>

Audio equipment of the 60's, 70's & early 80's has become my passion/hobby. I believe these pieces are like the vintage cars of the 60's & 70's, works of art that need to be preserved for anybody who's interested, so they can use and admire it. In no way am I putting down the new gear. It's just now I can afford to have equipment that was way too much and not as important as trying to stay above water back when I was a lot younger.

So what I do is buy gear, take my time at cleaning and replacing bulbs. If the wood case needs attention I have my good friend/woodworker/cabinet maker with 35+ years of experience handle that and if it needs work inside I usually bring it to Alex Audio & Video of New Hope.

My gear is not the cheapest you'll find, I take pride in trying to make it look like and sound like when it was new. If your going to be in the area drop me a line, you can give it a look and hear how it's sounds, there's no obligation to buy.

You can access some of my gear on the Fargo ND Craigslist-for sale-electronics- type in the search area 66919701057.
