2 blue pitts need a new home asap. 7 mo old. 1 male 1 female. They are sister and brother. And they are not fixed. They are both microchipped, an both have had all 3 of they're parvo shots. I have all vet records. They have not had a rabies shot yet they will need that. Their microchips have not been registered yet so you wont have to switch them from one name to another you just go online or call to register their chip #. I have all that info as well. Both are great with children dogs and cats. I am askin a 200\$ rehoming fee for EACH of them. FIRM.. i will come down on rehoming fee to 300\$ if they can stay together because these two are inseperable and have never been away from each other since birth. Serious inquiries only. Feel free to txt call email anytime. Thanks.
