if you are a metro pcs customer and you have received phone calls from a 754 #, be aware!!!

It seems someone has the list of all METRO PCS # and make phone calls to others on the same network. They leave a marketing recording but when you call back it is a live person and never called your number. They may be using your # also to place calls. I have received various phone calls with messages, distorted or someone saying it is a family member asking for help. We call back the number and it a live person who we do not know and had no knowledge of the phone call and vice versa. I suggest if you are in a Metrop PCS network you make customer service aware. Specially if you have a hispanic last name these calls are frequent.

How did they get anyone#??
