

2009 Sea (215255 USD)

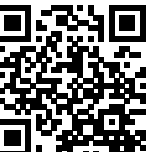

Location **Mississippi**
<https://www.genclassifieds.com/x-501712-z>

Here for sale I have two 2009 Sea-Doo jet skis on a single axle aluminum trailer. They are in great shape, they are an awesome time and perfect summer toys. They both are lighting quick, extremely reliable, and ride like a dream. They have always been covered either by the factory black cover or kept in the garage. Always flushed and washed after each and every ride. They also have had all services professionally done, including fluid changes, maintenance, and battery changes. If you purchase these jet skis, they will come with two factory covers, an aluminum trailer in excellent condition, 2 keys that are interchangeable programmed and 2 learner keys that are interchangeable programmed (the learner key limits the RPMs and speed for beginner drivers), all paperwork and titles, and two jet ski anchors. My starting price is \$12,500. I will consider offers, but nothing outrageously low. Call or Text anytime at (228) 238-four94zero.

2009 Sea-Doo RXP (red)

- 106 hours
- Intake System: 215 hp Supercharged Intercooled Rotax® 4-TEC® engine
- Bore x stroke: 100mm x 63.4mm

 - Length: 121.0 in.
 - Width: 48.0 in.
 - Height: 45.8 in.
 - Weight (dry): 795 lbs
 - Rider capacity: 2
 - Fuel capacity: 15.9 gal

Additional information:

- Both water crafts have dual drain plugs, adjustable mirrors, variable trim system, padded re-boarding platforms and footwells for maximum traction and comfort, bumpers that help craft from damage while docking, and finally a Semi-V designed hull that ensures a smooth and comfortable ride in a variety of water conditions, as well as greater maneuverability.
- The RXP-X (silver 255 hp) is one of the fastest jet skis made. It can accelerate from 0 to 50 mph in 2.9 seconds, and reach top speeds of up to 70mph. This jet ski feels like a racing machine, it carves through the water turning on a dime.
- The RXP (red 215 hp) is capable of reaching the same top speeds as the RXP-X (c 70mph), although has a slightly slower acceleration. However, this craft is better for towing water sports such as tubing, wake boarding, knee boarding, and more.
- Both crafts are great machines and you will not be let down once you feel the power and excitement that comes with these bad boys!
