We are still looking for our hahn's mini macaw, Casey. She was last seen and heard in the 2 weeks leading up to 6/2 in & around behind white oak cinemas and Abberly Place apartments. Since then, we've had no audio or visual hits on her. Please, if you see a green bird or hear unusual or jungle like noises within even a few miles of this location, call us! She's a bit bigger than a cockatiel, and may respond to her name. She's very loud. She's been missing 5 weeks now and we are missing her terribly. We are offering a reward for her safe.
