

## 22 Sailboat amp galv. trailer MUST GO

Location **Maine**  
<https://www.genclassifieds.com/x-502295-z>

22' Luger sailboat for sale with heavy duty galvanized trailer (with large, 5-lug wheels). Trailer was purchased separately and could still use a few adjustments to fit the boat perfectly, but can be towed now. Solid fiberglass hull. Newer sails and rigging. Needs some work due to neglect. The boat was redone about 10 years ago and then just sat out of water. Main problem is that centerboard is stuck and pivot pin is corroded. A handy person could get this in the water with 8-10 hours of work. It will need a new centerboard pivot (hinge) and small fiberglass patch to cover it. Also, it could use new bottom paint and top paint wouldn't hurt either. Great beginner small project boat. I'm selling because I bought a 19ft. MacGregor that is all ready to go in the water.

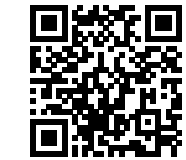

Interior is in good condition and of varnished wood. Includes 4 lifejackets, anchor, compass and some other basic equipment. Large cockpit. Berths for up to 5 (two small in the bow cabin), galley table and cabinet (sink was removed, but there is space for one). No cushions. Two rudders (neither was the original).

The exterior photos are of a different identical boat and the interior photos are of my boat, which has been tightly covered in several layers of plastic for the past year, so it is very dry inside now.

Also available for \$200 more: a 6-hp longshaft Envirude kicker. Motor was gone over by Bamforth Marine and is in good shape with strong compression. Motor is not for sale separately, but I will sell the boat without it.
