Selling my extremely capable gaming pc. This pc has been kept in immaculate condition, no smoke no dust nothing, see pics. This pc has it all. A powerful CPU clocked at 3.3 with hyper-threading for the heavy lifting. The graphics card is a Gigabyte 7850, I have officially played everything with this card paired with the i3. Games like Metro 2033 have an average frame rate of 80-90. Even new games such as GTA 5 and Witcher 3 will play with no problem in 1080. I am also including a 2TB hard drive with less then 150 hours of use. The hard drive boasts a speedy 7200rpm and has more then enough space for your whole game and media library. The Crucial ram is known for its reliability and because of that it is backed by a lifetime warranty. The case is attractive and functional with two powerful case fans. More then enough room to expand in the case with many hdd and ssd mounts. This computer is capable of all of the most daunting tasks, but is also able to crush everyday work ie word processing and surfing the web. Fresh install of genuine Windows 7 Home Premium. I am not interested in trades. The price is \$400 or best reasonable offer. I will not hod the computer for anyone, first come first serve.

Cost of buying parts new:

CPU: Intel Core i3-2120 3.3GHz Dual-Core Processor (\$99.98 @ Amazon)
