

## Back Flow (meridian)

## Location

## Idaho

<https://www.genclassifieds.com/x-502367-z>

So anyhow I come home from work and the plastic thing-a-ma-bobber on the top of my back flow do-hicky is spraying water up the side of my house. I know there is some type of float/seal thing-a-ma-gig in there that seems not to be working. Who can fix this thing? I want someone that knows what they are doing and can fix this so I can turn my sprinklers back.
