Free laptop recycling (Cary raleigh)

Location **North Carolina**
https://www.genclassifieds.com/x-502670-z

The town of Cary now charges $9 to recycle laptops. I don't.
I will come pick up your old unwanted laptop for free for recycling, working or not.
If it can be fixed and used again I will fix it and sell it, if not I will remove any usable part and test them for reuse and the rest will be turned over to an electronics recycler
If you include the hard drive I will wipe and then scrub it to make it safe from recovering any of your data
If you want to keep the hard drive I will remove it for you on the spot, but I would like all the mounting hardware attached.
Dead motherboard? no problem. Broken screen? no problem. You backed over it with a truck? well that might be a problem.
If you have data on the old hard drive that you want to save, I can offer this service at a reasonable fee or even free, as long as the hard drive is not dead
I'm just trying to learn laptop repair so any help is greatly appreciated
Call only
