I want to be 'your computer guy'.

When people ask 'Do you know where I can get my computer fixed?' I want you to happily give them my details.

How do I plan to do this?

Affordability. I charge a flat rate of just \$50 per machine for labor.

Knowledge. What the problem is, how it happened and how you can avoid it in the future yourself.

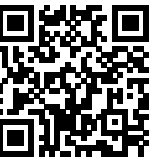

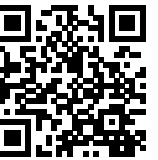

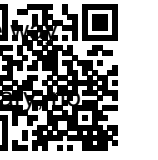

Peace of Mind. I include a 30 day warranty so you know you're covered after you've picked up your machine.

Information. Questions in the future? Call and get them answered. I'm happy to help any way I can.

Integrity. No pirated software or 'hacked' fixes giving you issues later on. We follow the rules!

There is nothing worse than not knowing what's going on and having to rely on someone else to fix it. Worse yet once it's all said and done you're still none the wiser about it.
