When you buy a set of my handmade pickups, I will install them for free, include a lifetime warranty, and do a setup to lower action and improve playability. I make handwound electric guitar pickups right here in East Nashville using only the best parts available. I do all the pickup repairs for guitar shops around the country and have modified guitars for hundreds of professional musicians, and have had my pickups featured in publications like Premier Guitars and Tone Report Weekly. Please see my website for more information:
