

Healthcare Business for Sale (25000 USD)

Location **Georgia**
<https://www.genclassifieds.com/x-504074-z>

I developed a specialized digital signage business which currently I've invested over \$195,000 behind it. We're in 500+ locations. Very easy business to manage.

The business is very profitable which each installation making me anywhere from \$750 to \$4,500 per location. With just 10 locations you could make anywhere from \$5,000 to \$45,000 a month. This business has the potential to be in thousands of locations. My current competitors make over \$500,000/month.

My setup is more advance than my competitors since I am using custom made software for it all that lets me control the time advertisements should display, where they should play, what the display should exactly look like and the fact I use the best equipment only.

I'll help you with the entire transition process, and help you through the entire learning process as well. I've documented everything out so every step can be delegated or automated easily.

I'm looking to sell off my Georgia/Atlanta locations because it is too difficult for me to manage with the new pharmacy I purchased.

Call me and I'll happily share all the details with.
