

Live Horns, Synth Horns, you need them, I have them (Dacula)

Location **Georgia**

15 years of instrumental performance with wind instruments have led to countless performances and a passion for creative works.

Producers, if you are looking to add that something special to your mix that can't be found in the box, how about some live horns? Stack them up and get a marching band sound, spread them wide for a more balanced orchestral vibe.

Songwriters, horns aren't just for jazz...although that IS a great application for them, R&B, Soul, Neo-Soul, all benefit from the warmth and vibrance that horns can bring. If you are looking to stand out from the pack this a way to do just that!

Specializing in all shapes of Saxophone, Trumpet, and as an added bonus EWI (Electronic Wind Instrument - aka...control the instruments that you have in the box like it was a sax). The possibilities are limited only by the imagination and with the experience behind the keys, the imagine has no bounds.

Looking forward to hearing from you and working together.
