Why would you hire an engineer? To take your music from the bedroom to the masses. - Most Unsigned/Indie/Hobbyist Artists

You may make music with dreams of a new lifestyle, or maybe you work your craft to explore creativity and an outlet. The reasons vary and so do the options on Craigslist. Each engineer, each studio offering different rates, unique gear, knowledge, and experiences. Ultimately, like the title says, I engineer for the music and not the money with the understanding that value in a product or service can be related to it's cost. That said, if you want to blindly reach out to someone who pushes a price, go for it. If you want something more than that...read on:

I'm located in Gwinnett County, which can be harder to reach without a vehicle. For those without suitable means or time to travel I offer:

â€¢ Mobile recording/engineering services including: Recording, Mixing, Mastering, Production all at a mutual site of your choosing.

â€¢ Remote engineering services including: Vocal Editing, Mixing, Mastering, Production with file transfer via DropBox or a file transfer service of your choosing with a 3 business day turnaround including daily virtual pulse checks through FaceTime/Skype/etc. This is your project and you should be involved every step of the way.

If you can travel, I have a home-based studio with the following benefits:

â€¢ Remote location, away from the busy grind of the city and distractions that are common place in downtown locales and big studios

â€¢ Interruption Free, one client/group per session, no waiting, no worries

â€¢ Peaceful setting

â€¢ Pool Table/Lounge so you can enjoy your stay and step away from creation to refresh

â€¢ Kitchen/Delivery services

â€¢ No shoe policy/House slippers provided upon request (I keep a clean home)

â€¢ Tea/coffee/treats for all my artists

â€¢ Drinks (upon request)

â€¢ No work on my helps with equipment longer by the business and I have control

The services within the home studio environment include:

Recording, Mixing, Mastering, Production, as well as Vocal/Career Coaching

The benefits don't stop at engineering alone, included with all paid services (mobile, remote, or in-house) is a promotions package catered to your needs, as it makes little sense to go from the bedroom to the studio, just to put the music right back in the bedroom. Once the music is engineered we work together to push it out to your current fans and the fans who don't know they are your fans YET.

If the length of the message didn't scare you away and you want to build working relationships that last and truly work around YOUR goals with YOUR music rather than simply quote prices, feel free to reach out. If the timing isn't right at the moment, but you would like to connect and keep in touch feel free to add me on Facebook or reach out to me via email.

Until then...continue grinding and putting your best you out there.
