The Polaris dealer had me buy a brand new stator, claiming that was the issue, then after I installed the NEW stator, still had the same problem, that did not fix it, then the Dealer would not allow a return, so i was stuck with two stators and wasted big bucks, urggggggg.  
 So the problem turned out to be the ignition coil, swapped that and it ran like new, so this stator that i took off was not the issue and i left the new one on my kids ATV, so i am selling this used stator.
