

BICYCLE TIRE REPAIR NEEDED (Southington)

Location

Connecticut

<https://www.genclassifieds.com/x-504930-z>

I have a relatively new Trek mountain bike which continues losing air pressure between rides. I can't find a bicycle shop anywhere these days, so I'm hoping someone out there can help me. Not positive, but I believe the problem is the valve stem(s) or possibly a rim leak, not the tire(s) themselves. I need someone with bicycle repair/maintenance or racing/riding experience who can tell me what's wrong and either repair it themselves, or direct me to someone or some business who can. It's my only transportation, as I don't own a car, so you would either have to come to me (near the green on North Main St. in the center of Southington), or coordinate with me on the one day of the month I will rent a car for all my more distant appointments (medical, legal, etc.). Brakes work, but are a bit rusty and need to be looked at and oiled at the very.
