"Birth of an Angel - And the Future of Slavery" is the title of my futuristic erotic thriller

www.birtofanangel.com

Years from now a young woman is arrested.

We live in a police state and all prisons have long been "privatized".

Since she is not a violent offender, her time, her sentence is auctioned on Ebay.

Her time is bought by a rich old man who believes her to be the reincarnation of his long lost love.

He not only covets her body, but her youth and beauty.

Then the opportunity arises to have a body exchange operation with her.

Since he is a lot older than she is, he takes her body, and in his guilt, he leaves her his wealth only to realize a few years later that he really loves her.

He comes to believe that two people who really love one another, who will give everything to be with one another, can join souls in one angelic being.

Can privatized prisons lead to a police state and sexual slavery?

Can we be liberated from the Oil/Prison/Military/Industrial complex????

Can soulmates become angels?

Can humanity still evolve?

Believe in angels and soulmates?
