I cant believe i still have this girl. this is Zara. she has the cutest round face and biggest round eyes. she is about 2 years old she loves to play and loves to make biscuits. she is spayed, all shots, microchipped and will come with a collar and kennel

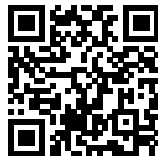

she did test FIV positive but they can still live long happy lives with this and can even live with other cats as long as they all get along. FIV is very hard to transmit and the only way it is transmitted is through a deep bite. this is no reason why she should not have a loving home. she is great with dogs too adoption fee is \$75
