EVEN THE MOST DIFFICULT DOGS CAN BE TRANSFORMED FOREVER with NO harsh treatment. You CAN turn your situation around. My certification is in a method taught in England. This method has been tried and tested for over 15 years and it works. This will save you and your dog stress and make life convenient.

MY CREDENTIALS:

- Holder of the Advanced Certificate in Canine Communication since 2009.
- I have taught courses on the canine through colleges and city programs in addition to in-home consultations. I have prepared reports for owners and dogs in trouble with the law. If you have a citation for your dogs 'bad' behavior, its helpful to go in with a report and evidence you have committed to learn about canine behavior!

THIS METHOD originated in England and....

- Will work for your dog in any gender, breed, age or history.
- Is a permanent solution to your dogs non-medical behavior problems - not a quick-fix.
- Teaches you 4 areas where you can show your dog you are responsible for its care.
- Gives you the ability to understand your dog's motives so you can respond correctly and calmly.
- Allows your dog to willingly cooperate with you through its own instincts and self-control.
- Uses no gadgets, force, commands, bullying or harshness as it is based on 100% respect.

- Is **not** traditional obedience training or pet psychic work.

THE SOLUTION: If you have home consultations, I teach you dog friendly actions that will send the signals to your dog. In four days of canine communications, you will be a custom made dog owner. You will respect your dog's needs and understand its will and needs. You will care as all decisions are now made by you rather than the dog. You should see changes in your dog before the consult is over.

When your dog is trying to be pack leader in a world it does not understand, each day and night are full of 1001 threats. When you learn how to send signals that your canine needs to see from you, it will allow your dog to wait for your decisions before reacting as seen in nature. Have you ever wondered why wild canines are not yapping, digging, chasing everything with pulse and running away from their pack? B

nature, canines are self-contained, tranquil animals that stay with the pack and go about their life quietly. Does that sound like a dog you could live with?

The bottom line is I know this method is good and I know it works. I make sure that my price is one within your reach. This will give you the relationship with your dog you have always wanted. Invaluable!

CITIES: I travel anywhere as needed (even out of state).

Wyoming:
