Tired of "photographers" with no samples of their work and promises of big paydays?

Well, here's something different.

Lots of examples and NO pay!

And... you don't need to send me your pic or meet me someplace sketchy.

Initial meeting at a public place of your choice, and yes, by all means, bring a friend.

I shoot fine art figures, and create photo-realistic fantasy collages.

Primarily shooting nude figures, I allow for model anonymity when requested as many of my models are converted into non-human creatures.

I do not have a budget for paying models at this point, but offer trade-for-disc of all pictures shot, as well as completed work. And/or, if there are shots you need, that will be included in the trade.

I can provide references on request from models I have worked with.

I am professional, respectful, easy to work with, and serious about my art.

Any examples shown here with the model's face included are with permission.

If interested, get in touch. I answer all responses, so if you don't hear back, it's a Craigslist glitch, try again.

Note my location in Northfield MA.

*the fine print... I hesitate to add this, because I don't want to put anyone off, but...

There are two issues that come up far too often. #1- I have been told by many who say they are very interested in working with me, but then when I reach out to them, they disappear. #2- I have been told by many who say they are very interested in working with me, but then when I reach out to them, they disappear. It's a good idea to meet in person and make sure you are interested in what I am doing. It's a good idea to meet in person and make sure you are interested in what I am doing. #2- The ad above specifically says this is NOT a paid gig. Too many respond and end up asking me how much I'm paying. The answer is "as the ad said..." If you do not work for trade, that's perfectly OK. I totally respect that. That's why I say in the ad it's not a paid gig. Did mention it's not a paid gig. I'm actually fun to work with, but needed at this point to add this info. OK... that's my current only fine print.
